Dear Hiring Manager,

I am writing to express my interest in the Full Stack Developer position at your company. As a recent graduate with a Bachelor's degree in Computer Science, I am excited to bring my skills in object-oriented programming, such as Java and Python, as well as my familiarity with the AGILE programming method and database design and implementation in libraries like SQLite, to a dynamic and forward-thinking team like yours.

In my time at the University of Puget Sound I have had the opportunity to work on a number of collaborative projects, including a team project in which we worked with a real-world client and designed and developed a web app written in React.js and PHP designed to enhance the experience of museum visitors by allowing them to scan QR codes with their phones to receive more information about artifacts while on their visit. This experience has taught me the value of effective communication and teamwork in the software development process, as well as the ability to adapt to whatever my team needed to succeed, making me an effective full-stack developer.

In addition to my technical skills, I am a highly motivated and eager learner, always seeking out new ways to expand my knowledge and understanding of the field. I also have a passion for space exploration and technology as well as creating products that have a real impact on the world.

I believe that working for your would be a perfect fit for my goals and I am excited to contribute to the success of the team. Thank you for considering my application, feel free to reach out about any questions you may have about me at dascarbs@gmail.com.

Sincerely,

Daniel Scarbrough
